

SAP S/4HANA

migrations made easy

As SAP encourages clients to transition to S/4HANA by 2027, Addison Group is well equipped to support your organization through this transition. Partner with Addison Group to ensure you have the right talent in place for a smooth, successful transition.

Pre-implementation – Close collaboration with your internal stakeholders to understand project objectives, timelines, and talent gaps. Then strategically map out customized hiring plans for contingent labor, including project managers, technical and functional consultants, and staff augmentation, ensuring seamless alignment.

During implementation – We place top talent in key areas such as Project Management, Accounting & Finance, IT, and Human Resources, ensuring your teams have the expertise for success. Through regular quality assurance checkpoints, we ensure deliverables are on track and performance consistently meets or exceeds project standards.

Post-implementation – Our expert consultants ensure smooth system transitions, address post-launch issues, and implement continuous improvements. We provide specialized talent for system fine-tuning, user training, and process optimization. Our consultants, including SAP FICO, SuccessFactors, and HANA experts, work with your stakeholders to ensure your SAP S/4HANA environment evolves with your business needs and delivers long-term, sustainable results.

The Addison Group difference

We know great teams start with great people. That means we focus on quality, not quotas. It means working with you to get detailed insights on your teams so we can find people who fit, not just who's available. [Let's talk.](#)
